

**Species**

Southern Yellow Pine

**Source**

Walkway planks salvaged from industrial projects and other materials salvaged from a variety of buildings and warehouses

**Standard Dimensions**

a) Thickness: 5/8"; b) Width: 8.375"; c) Length: 2 to 10' with no more than 10% of footage to be less than 4'.

**Knots**

This product is not sorted for knot content, though in general knot content is moderate (less than 1 knot per square foot); some knots are broken, loose or fallen out.

**Holes**

Ocassional nail holes; no bolt holes. Nail holes commonly have some stain surrounding the hole.

**Checking/Cracks**

Unlimited as long as board is sound; end cracks to extend no more than 6" into board

**Grain Pattern**

Mixed

**Percentage Sapwood**

Unlimited

**Textures Available**

Weathered As-Is and Smooth

**Profile**

Shiplap and S3S

**Appearance Variation**

Boards can vary in appearance from piece to piece and even within a piece. The characteristics described on this specification sheet generally apply to each board's featured face. The opposite face and edges can differ from the featured face in texture, coloring, and other characteristics unless otherwise noted. Weathered lumber / barnwood will have at least one weathered face. The opposite face and edges can be any combination of weathered and fresh-sawn. If weathered, the weathering will often be different (amount, mix of colors, etc) than on the featured face.

Trestlewood sometimes uses one or more juicing processes to help fresh-sawn and/or less weathered/aged faces/edges blend in with weathered faces/edges. All else being equal, juicing is more likely to be used in situations where (a) lumber is cut from timbers or wider lumber (thereby creating fresh-cut faces and/or edges); (b) Buyer wants all (or most) faces/edges to be weathered/aged; (c) Buyer desires to increase the consistency of the weathered/aged look from face to face; and/or (d) Buyer wants a darker weathered look.
